

WIDE SPAN

We like simple, uncluttered design, to complement your own creativity. This is why our modular system, features an industry leading 800mm rafter spacing, allowing you to see more above.

EXCEPTIONAL VALUE

People love our beautiful outdoor shelter for socialising, or sitting quietly. We have simplified and designed out costs so our elegant shelters are also exceptional value, for such a high quality product.

SIMPLE PRICING

We have an all inclusive, installed price guide with two tiers. There are other, more bespoke configurations, which require a site visit first to discuss your project with you, for a free fixed price quote.

LED LIGHTS

Flexiroof rafters are designed to take recessed LED lights. These are flush fitting with a stainless steel surround. All wiring is kept hidden within the frame work, for a sharp, clean finish. Customers love this feature for evening entertaining.

POLYCARBONATE SHEET

Premium 3mm thick sheet, which is tough, durable, flexible, and blocks harmful UV light while reducing heat. That's year round protection, for Four Seasons Living.

TINY ARCH

A subtle downward curve of the sheet that delivers 4 key benefits:

1. Allows for our unique 800mm wide rafter spacing
2. Auto adjusts for thermal expansion and contraction
3. Directs rainwater away from joins. We do not use rubber seals which deteriorate!
4. No screws, penetrations, or weak points.

ELEGANT BRACKETS

Strong and durable stainless steel soffit brackets, are used with 3 of our 6 installation configurations.

POWDER COATED ALUMINIUM

72 Colours are available. New Zealand designed and manufactured, powder coated framing is made from 6061 T6 aluminium, which is stronger than window joinery alloy. This gives us a clear span of up to 4.5m in either direction.

**15 YEAR
WARRANTY**

Our warranty is the best you will find!

We can offer this because we use high tensile aluminium, all connected with stainless steel hardware. Tough and durable for all coastal and wind zones.
